

## BIOASSURED™

The BioAssured™ label on a pack of ASCEND Elite proteins provides you with the assurance that your product has passed the most rigorous testing for functionality and quality. This is the BioAssured™ procedure.

Every batch of ASCEND Elite proteins is validated using the same cellular tests (BioAssured™) and molecular fingerprinting techniques used in our research. This provides you with quality and functionality that is absolutely unsurpassed.

The BioAssured™ procedure includes testing against minimum standards for:

- cell (macrophage) inflammatory response
- muscle cell proliferation
- HPLC protein fingerprinting

The BioAssured™ procedure is exclusive and proprietary to ASCEND Elite Proven Sports Proteins. No other supplier of sports protein supplements can provide you with this level of assurance of quality and functionality.
